Organiser data
movements joined to NM flight records
2025 with labels, 2026 without
Open data
METAR, OurAirports, OSM, X-Plane stands,
EUROCONTROL files, OPDI, ADSB.lol
19 tables, 158 columns: schedule, NM clocks, traffic,
weather, geometry, ground-track clocks
outside LIRF
LIRF
Tree members
LightGBM, CatBoost
plain and anchored
Neural members
MLP, five TabM
families
Gate: probability p
of a schedule copy
Blend: 0.28 trees + 0.72 neural
p * s
+ (1 - p) * normal model
Pushback stack on label minus blend
(rows with a ground track), stand bound
Step A band table
(no NM record,
s above 4 h)
Month level: June and July
Row rules: Step A date, LOBT window, LFPG precision
